

The recent actions of Sinclair Broadcast in attempting to directly influence a national election by broadcasting a film meant to smear a presidential candidate as "news" is unconscionable. They are abusing their access to PUBLIC airwaves and as such should be scrutinized ruthlessly by the FCC. They have responsibilities as broadcasters to truth, honesty, integrity, fair-play and the public good; responsibilities that the FCC must force them to carry out. History is not up for grabs. This smear campaign against John Kerry should not be assessed as hearing the other side of the story. This is not news. It is political advertising of the sorriest and most spurious kind and should be thought of and regulated as such. Don't let them get away with this. Do your job. Do what is right.

Thanks,
Amber (Concerned American Voter)
